

Park Model RV Cabin Delivery Instructions

We require,

- Clearance height of approximately 15ft.
- Width clearance of 2ft wider than your cabin(if the building is 16ft wide we need 18ft).
- A driveway or path that meets all conditions above. If not we may not be able to deliver on schedule, depending on ground conditions.
- If gates are present they must be 12in+ wider than the width of the cabin.
- If there are any steep hills, sharp turns, or creeks to cross please send us a short video clip of the route as you drive through with a vehicle or a UTV. Starting at the beginning of the road all the way to the site.
- Room to maneuver a truck/trailer. Also for the crane to be set up(If questionable a Hilltop representative may have to come out to survey site).

-All changes must be approved before construction begins. Any changes made after construction has begun may result in an additional charge.

-Please take a moment before you order your cabin, and consider the orientation of the trailer and where the tongue will be. Can we back it into the site? Will the correct end be where you want it? (Porch facing the correct direction) All changes must be approved before construction begins. Any changes after construction has begun will result in an up charge.

-If your site is difficult to access we may need a large tractor or bulldozer to pull us to the site. The customer is responsible for providing the equipment needed.

-If you are out of our delivery radius the structure will be delivered with a third party hauler. You will be responsible to speak with them and check if they are able to do setup (most of them do not) and discuss details and to pay them once the building is delivered. We will give you a list of Haulers who we work with and will help you coordinate the delivery.

-If we are unable to deliver it to the site we may need to park it on or near your property for a local delivery company to finish delivery. The customer is responsible to hire and pay the 3rd party setup crew, if needed.

- If you have any questions about delivery, please ask to speak with Dave or Josh to discuss delivery options, the best route to follow.

Call: 615-789-0062

Thank you for your cooperation!
